WHY LORI?

Lori is an eggless pasta and they also have a gluten-free range.

These pastas are perfect for those of you catering to people with special dietary needs.

“Our philosophy is simple: from the land to the table, we offer pasta that is not only a pleasure for the palate, but also a conscious choice for your health and for the planet.”

The Loizzo Family Mill created more than 40 years ago, is our added value.

In fact, we use only semolina from selected durum wheat blends for our pasta. This also allows us to control the market and direct our pricing policy.

IMPORTED ITALIAN PASTA

A COMPANY WITH GREAT VALUES

“Our company was founded on the understanding of tradition and love for Emilia-Romagna, a land of great culinary culture. For us, doing business means opening up to the world and welcoming the new, without ever forgetting our values and the rules for artisanal fresh handmade pasta.”

The deliciousness of their ready meals and deep-frozen fresh pasta is guaranteed by the ingredients they choose: whole ingredients, fresh or deep-frozen, processed directly at their facilities to create dough, sauces, and meat, fish, cheese, and vegetable fillings.

TO PRODUCE THEIR DOUGH

Surgital only uses durum wheat semolina processed in the best Italian mills, and at least five fresh pasteurised eggs for every kilo of durum wheat semolina.

This way they can guarantee the cookability that is essential for the use of fresh pasta in large-scale catering.

CERTIFIED EXCELLENCE

The production facility meets food safety rules and is committed to involving all employees in self-monitoring plans using the HACCP method.

DANISH DAIRY

Arla is owned by their farmers and they produce most of the milk needed to make their products.

“As Arla farmers, we are dependent on nature and we have a responsibility for climate change. That’s why we are taking action to improve how we farm and produce dairy for you and your family. We inspire, push and reward each other to continuously do better. To reduce our carbon footprint and improve the protection of nature.”

Together with their farmers the owners have committed to reducing on-farm CO₂e emissions per kilo of milk by 30 per cent by 2030. Rewarding farmers for their climate activities is an important milestone towards accelerating CO₂e reductions on farms.

DID YOU KNOW?

“For a hundred years, we have been bringing fresh, wholesome products of certified origin and quality to restaurants around the world. In our products tradition, talent and innovation come together to give balance and make each of your dishes an excellence.”

The range we stock has several finished and semi-finished products for the professional kitchen. Greci has obtained their ingredients from raw materials selected for quality and origin, processed mostly fresh in season, from direct or controlled supply chains.

Many of their products are tinned in oil instead of brine to ensure high-quality products, The artichokes in particular have been prepared so that they can be used directly from the tin and do not need to be further cleaned or processed.

IMPORTED COLD MEATS

Extract from Vitali:

“An ideal synthesis that embraces our world: a know-how deeply rooted in the Emilian Apennines, where it all began. A production that we have kept up with the times for three generations, thanks to investments in increasingly innovative, respectful and sustainable processes and systems. A transparent supply chain to which we have dedicated ourselves with unchanged passion for over sixty years and with the obsessive care typical of those who want to create only Italian cured meats worthy of the best gastronomy. All you have to do is get to know our “champions”, one by one: from the Prosciutto crudo di Modena DOP to the cured hams of the TuttaFetta range, from Dolcecuore to cured Guanciale, passing through many other excellences of Italian cured meats... it will be a truly exquisite read.”

IMPORTED ITALIAN CHEESE

“Grana Padano and Provolone are the most typical dairy products of Cremona area and, from generation to generation, the master cheesemakers have been passing on an incomparable heritage of experience and expertise. A heritage that Fattorie Cremona has made its own and jealously guards. Provolone, for example, requires an uncommon manual skill to stretch the curd and give the desired shape, as well as a deep knowledge of milk processing techniques to achieve the special taste of this great cheese. The same applies to Grana Padano, and Fattorie Cremona is one of the leading producers within the Consortium members.”

Fattorie Cremona is certified GSFS – Global Standard for Food Safety Issue 8 and IFS International Food Standard Version 6.1 by CSQA.
